About

I am a developer who enjoys producing clean and tested code while coding Full Stack applications mainly using ReactJs and React-Native, to create beautiful and ergonomic interfaces to enhance the user's experience.

Work Experience

Bid Local

2020

Full stack React-Native developer

Mobile eCommerce auction app: Worked as a team of 5, using the Agile Methodology, Trello for the project management tool, and Git for the version-control system.

I was responsible for and implemented:

- Front end functionalities: login, register, splash page, connection between GraphQL and backend, GraphQL queries, and styling with CSS.
- Tech stack: React Native with Expo, GraphQL, Node, MySQL and Docker.

Dream Home

2020

Full stack React-Native developer

React Native application that finds the users' dream home, based on their budget and preferences, anywhere in the UK. I used the waterfall methodology in order to produce a MVP while respecting short deadlines.

- Designed and developed the application: splash page, complex form with multiple fields (sliders, inputs and radio buttons), and displays the result on a UK map with Google Map API.
- Tech stack: React Native with Expo, Native Base, Google Maps API, Zoopla API.

I Heart Studios

2018-2020

Group Financial Controller

- Initiated a complete financial "bottom up" review and focussed "real time management" on cash

Open Energi

2017-2018

Commercial Financial Controller

- Reduced Overheads by 53% without affecting performance or quality

Ombu Group

2014-2017

Group Financial Controller

- Fundraising support and developed a valuation model

Deloitte

2012-2014

Audit Associate

- Awards for outstanding performance with Vodafone and Applied Communications Inc engagements
